Owner: Limerick Park

Project: General Laboratory Testing (Fee for Service)

Species: Feed

Samples Received: 13 x Hay

Date Collected:

Date Received: 02-Dec-2019

Submission:

Notes regarding the submission of fresh hay and pasture samples for ARG T

The interpretation of the test results is **absolutely dependent** on how the sample supplied was collected. Ideally the sample should be a combination of sub-samples from all over the paddock or from at least two sides of a hay bale. Even with ideal sampling, "hot" spots may be missed. For a risk assessment the sample should be representative of the feed animals consume. Animals on low to moderate risk paddocks or fodder should be observed daily. Animals should be removed from high risk pastures or feed.

The test results of **green samples** do not necessarily reflect the true levels of ARG T after drying off of the pasture. There is the possibility that the ARG T levels may increase.

Serology Results

Test Type: Quantitative ARG T ELISA; Hay, Pasture & Fodder

Date Tested: 03/12/2019

Spec No	Spec ID	Spec Description	Result
0001	Triskele Redgum Pdk	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)
0002	Triskele Windmill Pdk	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)
0003	Triskele Middle Pdk	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)
0004	Triskele South River Pdk	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)
0005	Triskele Nth Pivot	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)

2/2

Test Type: Quantitative ARGTELSA; Hay, Pasture & Fodder

Date Tested: 03/12/2019

Spec No	Spec ID	Spec Description	Result
0006	Triskele Railway Pdk	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)
0007	Bobs 3 Way Pdk	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)
0008	Bobs Waterloo Rd Pdk	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)
0009	Cross Crooked Rd Pdk	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)
0010	Bruswick Pdk	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)
0011	Hentydale Pdk	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)
0012	Roelands Pde	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)
0013	Ripplewood Pdk	Hay	Not detected - No Risk (On average less than 1 gall/kg in sample supplied)

Yours faithfully
